

LB THERM PVC-XPS 10 mm

COMPOSITION: PVC|XPS|PVC

EXTERNAL LAYER:

PVC on both sides, decorative foil on one side (Renolit, Cova, Hornschuch)

- hard panel acc. to DIN 16927
- resistant to mechanical shock acc. to EN 438/2
- external layers protected with a foil
- suitable for outdoor application
- resistant to atmospheric conditions acc. to DIN 53387

PVC thickness – 1,0 mm

CORE:

XPS - extruded polystyrene:

- Fire resistance: E class acc. to EN 13501-1
- Thermal conductivity rate – 0,034 W/(m*K)
- XPS – DIN EN13164-T3-CS(10\Y)200-DS(70,90)-DLT(2)7-TR600-MU50

Thickness	[mm]	10
U*	$\left[\frac{W}{m^2 K} \right]$	2,39
*Heat transmission rate has been determined by a calculation method		

AVAILABLE SIZE [mm]: 3000x900
