

GFK standard sandwich panel

Composition: GFK - XPS - GFK

The GFK (Glass-Fiber Reinforced Plastic / Glass-Fiber Reinforced Polymer) sandwich panel is composed of two thin layers reinforced with glass fiber and a lightweight XPS core, combining low weight with high mechanical and weather resistance. The STANDARD version features an external laminate with visible glass fiber.

Sizes:

length x width - max. 9000x3000 mm,
thickness - max up to 150 mm.

Top layer GFK standard:

white laminate with white gelcoat* and visible glass fiber,
thickness: starting from 1,0 mm,
density: 1400 [kg/m³] (ISO 1183),
fire resistance: E (EN 13501-1).

* Available also in various RAL colors upon request.

Inner layer XPS:

closed-cell structure extruded polystyrene (XPS) with grooves, without HBCD,
density: ≥ 33 [kg/m³] (EN 1602),
thermal conductivity (λ): 0,034 [W/mK] (EN 13164)
water absorption: < 1% (EN 12087),
fire resistance: E (EN 13501-1),
compressive strength at 10% deformation: 200/300 [kPa] (EN 826). **

** 500 and 700 kPa available upon request.
